# SD SERIES DISPENSING HOSE REELS

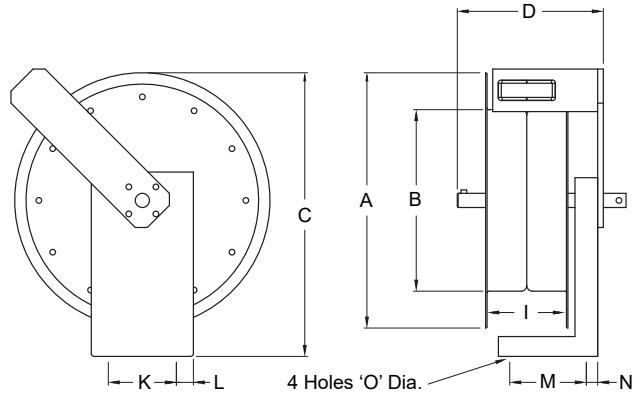

Metreel offer an extensive range of high performance, durable hose reels with spring retraction for the most demanding applications.

The range of SD Series Hose Reels are ideal for heavy duty use in maintenance shops, garages, workshops and industrial units. The spring operated reels are constructed from heavy gauge steel to give maximum mechanical strength and are supplied with a robust roller guide and stop-catch to relieve tension. Manufactured using a minimum number of components, the hose reels are low maintenance, as the drum revolves on a pair of ball races which are sealed for life.

An important advantage is that the SD Series Hose Reels are extremely versatile. Consequently, they can be used in the servicing of heavy construction equipment on-site which reduces expensive 'downtime' considerably.

## FEATURES

- ◆ Self-retracting
- ◆ Nylon rollers
- ◆ Up to 3/4" bore as standard, 1-1/2" by request
- ◆ Reduces wear & tear
- ◆ Ensures increased productivity
- ◆ Powdercoat poppy red finish as standard

Length (M)	Hose Reel Model			
Up to 9	SD18/025/1A	SD30/038/1V	SD30/050/1V	SD30/075/1X
Up to 12	SD30/025/1V			SD40/075/1P
Up to 19				
Up to 26	SD40/025/1R	SD40/038/1R	SD40/050/1R
